

Geotex Engineering provides geotechnical and construction materials engineering testing for education, municipal, water, transportation, and commercial projects.

For over 20 years we have helped clients build and improve schools, roadways, developments, and infrastructure across Texas and Oklahoma. Clients choose Geotex because of our commitment to quality, our understanding of their needs, and our skilled and professional staff, which include licensed engineers, project managers and technicians. We are a woman owned firm that holds multiple disadvantaged business certifications from various agencies. Helping our clients meet their Disadvantaged Business Enterprise (DBE) and other disadvantaged project goals is an added benefit of partnering with our firm.

GO GEOTEX BECAUSE YOU NEED TO KNOW

With a staff of seasoned professionals, a drilling rig fleet, and a considerable range of in-house laboratory capabilities, Geotex stands ready to tackle your demanding and challenging projects.

GEOTECHNICAL ENGINEERING

We identify issues before they become your problem.
